4. Title of the Project:

Legal Aid

5. Aim, Objective, Expected Outcome:

Aim	• To establish a mobile app, NyaySetu, which would educate users about their legal and human rights based on their personal profile while also providing a secure, anonymous space to report human rights abuses. • The app would provide community members with the information, means, and secure pathways to make reports and raise awareness about human rights abuses and violations acting as a method for advocating for and protecting human rights within their community.
Objective	• Develop an artificial-intelligence powered chatbot that can answer queries or questions about rights in an immediate

	and easily comprehensible manner. • Develop a secure, encrypted system for anonymous reporting on human rights violations, with the option to upload media evidence. • Provide "hotline" options for immediate contact with human rights, and legal aid, organizations, with follow up options. • Involve the community to support this process, support awareness and contribute to creating a safer space for everyone by providing information/knowledge and reporting.
Expected Outcome	• Awareness and Empowerment: Increase knowledge of human rights, especially within vulnerable groups, so that users feel empowered to identify and respond to violations. • Anonymous Reporting, Support, and Connection: Provide a mechanism where no abuse can report anonymously, strengthens the connection between victims of abuse and support organizations, and allows for timely intervention and justice.
